

BOLSTER® DESICCANT

Fast, effective dry down for canola, pulses and soybeans

QUICK FACTS:

Active Ingredient	Diquat (240 g/L)
Group	22
Packaging	2 x 10-L case 115-L drum 500-L tote
Rainfast	15 minutes or when dry
Water Volume	Ground application: 90 – 220 L/acre for most crops
Re-cropping	None
Restrictions	
Storage	Store above 0° C. If crystallization occurs because of storage below this, warm to room temperature and agitate gently until reconstituted.

REGISTERED CROPS

Canola	Peas
Chickpeas	Potatoes
Lentils	Soybeans

MIXING INSTRUCTIONS:

1. Fill tank 3/4 full with water.
2. Begin agitation and continue throughout mixing and spraying.
3. Add correct amount of BOLSTER®.
4. Add CO-OP® Surfactant NI adjuvant at 0.1 L per every 100 L of spray solution.
5. Fill with correct amount of water.

APPLICATION GUIDELINES*

Crop	Stage	Rate (L/acre)	
		Ground	Aerial
Canola	90% of all seeds on entire plant are brown	0.5 – 0.7	0.7 – 0.9
Chickpeas	Plants are yellow, pods mature, seeds changed colour and detached from pods	0.5 – 0.7	0.7
Lentils	Lowest pods are light brown and rattle when shaken	0.5 – 0.7	0.7 – 0.9
Peas	Bottom pods are ripe and dry, seeds detached from pods	0.5 – 0.7	0.7 – 0.9
Soybeans, Dry Beans	Crop has lost 80 – 90% of leaves, and 80% of pods are yellow	0.5 – 0.7	0.7 – 0.9
